# I. Company Profile

**Company Name:** Valmiz, Inc.

**CEO:** Mr. Robert Pineda

**Year Established:** 2022

## Company Description:

Valmiz is an unparalleled technological platform poised to revolutionize the digital landscape. Valmiz represents not just an incremental improvement but a seismic shift in how we perceive and interact with technology. As forward-thinking leaders, you are presented with an opportunity to be at the forefront of groundbreaking innovation that transcends existing technological boundaries and ushers in a new era of limitless possibilities.

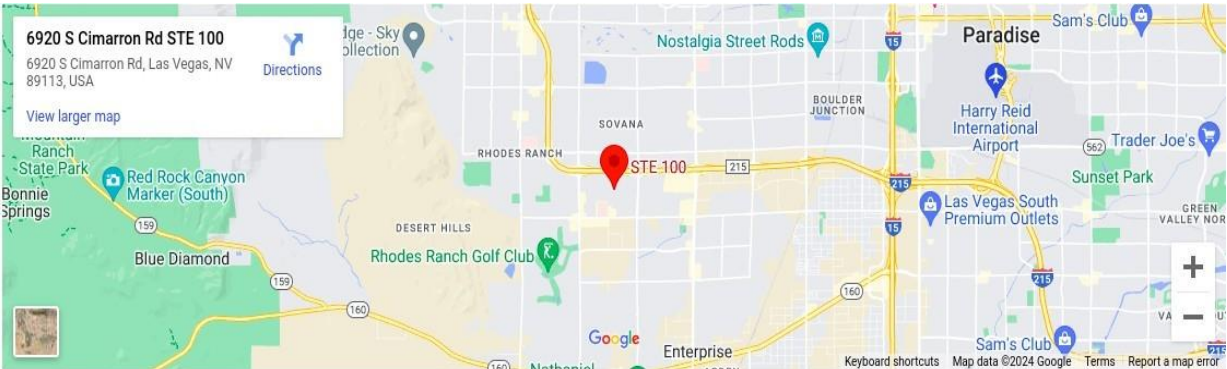

## Their Purpose and What They Do:

Valmiz's purpose is to put the human at the center of the process; to preserve human morals and ethics and values—the laws of Valmiz; while enhancing their capabilities with AI. It has been designed to incorporate Dual-use Technology (DUT), to support all areas of a domain, for example, military and commercial industries; wholesale and retail; and research and application. Valmiz is more than just a technological innovation; it is a canvas for human imagination. By providing a robust, highly efficient, incredibly fast, powerful, and secured platform, Valmiz empowers innovators, creators, and visionaries to push the boundaries of what is possible. The versatility and transformative potential of Valmiz ensures that its applications are only limited by human creativity and ambition.

## Office Location:

HQ: Las Vegas, Nevada

SEA OFFICE: Manila, Philippines

## **III. Business Overview**

Valmiz will be provided as Software-as-a-Service (SaaS) with monthly subscription through a web API. Valmiz will also be provided as On-premises Software with fixed licensing costs. Organizations that want to enhance their existing automation systems. The true power of Valmiz lies in its flexibility and universal applicability. Whether in healthcare, finance, education, entertainment, manufacturing, space, defense, or any other field, Valmiz seamlessly integrates with existing systems to enhance their functionalities.

### **A. Bespoke Solutions**

Valmiz is also a bespoke platform offering tailored solutions that deliver efficiency and accuracy. Our customized approach allows Valmiz to meet the unique needs of each organization, ensuring that you achieve the highest levels of performance and effectiveness.

## **IV. Function of the Unit**

The unit's primary function is to have a deep understanding and practical application of the Common Lisp programming language. Through the study of Peter Seibel's "Practical Common Lisp," interns will gain foundational knowledge in Lisp programming concepts, syntax, and best practices. The unit aims to prepare a hands-on learning environment where interns can apply their theoretical knowledge to real-world scenarios, specifically through the development of a CLOG (Common-lisp Omnificent GUI) Project.

## **V. Job Description - Intern/Trainee**

- Studying the content outlined in "Practical Common Lisp" by Peter Seibel to grasp the fundamental Lisp programming paradigm and dynamic environments.
- Participate in discussions and present daily progress output on PCL and the CLOG Project, including pop quizzes on the Valmiz Channel.
- Collaborating with other interns to conceptualize things inside PCL and how to develop a CLOG-Project, demonstrating proficiency in implementing solutions using Common Lisp.
- Documenting the progress, challenges, and solutions encountered during PCL.
- Using Git to push updates on the Private Server Gitea, especially PCL and the CLOG-Project until completion as part of an internship, showcasing their understanding of Lisp programming techniques and problem-solving skills.

## VI. Michael Adrian Villareal

## E. Certificate of Completion

### CERTIFICATE OF COMPLETION

This is to certify that **Mr. Michael Adrian Villareal** has completed his internship at Valmiz, Inc. from February 1, 2024 to April 8, 2024.

This also certifies that he has finished the required 480 hours of practicum in this company.

This certification is issued upon his request for school requirement purposes.

Issued this 5th day of June 2024 in Bauang, La Union.

Truly yours,

**Rommel Martínez**

**CTO**

VALMIZ, INC.

## F. Narrative Report

### **Leading the Team**

At the same time, I had the responsibility of leading/working with two close friends who were also interning with me. Balancing our friendship with the role of guiding and reminding them but all the way was tough and it required patience and adaptability to help ourselves grow professionally.

### **Switching OS: Windows to Ubuntu**

Switching from Windows to Ubuntu was a big change that improved my workflow. I quickly became comfortable with the Ubuntu terminal, which boosted my productivity and improved my command-line skills essential for programming.

### **Learning the Basics of Common-Lisp**

I started by studying the basics of Common Lisp, focusing on its powerful macros and functional programming style. "Practical Common Lisp" was my guide, helping me understand the language step by step.

### **Git**

I started to learn about Github and Gitte. Learn how to locally push, pull, fork and clone from a remote server used in the company.

### **Development**

Putting my knowledge into practice. I developed a clog-based website using Common Lisp and DOM JavaScript and Some Font API's. This project allowed me to apply what I had learned practically, making decisions on coding and design to create a website.

Also, I focused on improving my technical skills by learning advance and effective debugging, functions and data, list data structures and trees, side effects, applicative programming, conditionals, graphic and eval notation, recursion techniques, OOP and heavy macros using CLAGITSC book (currently on-progress) after the Development of my 1st Website Project.

Additionally, Docker. using it, streamlined my process to locally setting up WordPress and becoming proficient with it and helped Valmiz to manage their own website. I also became proficient using GNU Vanilla Emacs, mastering keybindings to code more effienctly. Lastly, I created a 2nd CLOG-based for Valmiz Interface Project about Visualization of Data Mapping which was 70% lisp 10% CSS and 10% Parenscript and 10% HTML.

## G. Trainee Profile (Resume/CV)

### OBJECTIVES

Eager to gain practical experience in a professional setting, contribute to real-world projects, and learn from pioneers and professionals in the field

## KNOWN PROGRAMMING LANGUAGE

- |                 |                   |
|-----------------|-------------------|
| <b>BACKEND:</b> | <b>FRONT-END:</b> |
| • VB            | • CSS             |
| • JAVASCRIPT    | • HTML            |
| • PYTHON        | • J-QUERY         |
| • JAVA          |                   |
| • C#            |                   |
| • Common-Lisp   |                   |

## ACHIEVEMENTS

- Recognized as a consistent honor students throughout Senior High School 2018-2020
- Top 10 among the 1st Year B.S Computer Science Students for the S.Y 2020-2021
- Academic Scholar for 2020-2021 at Adamson University
- Rank 9 among the 3rd Year B.S Computer Science Students for the S.Y 2022-2023

## SOFT SKILLS

- Time Management
- Communication
- Creativity
- Team-work

## EDUCATION

- **SAINT JOHN PAROCHIAL SCHOOL**

2014-2020  
 JUNIOR/SENIOR HIGH SCHOOL (STEM)

- **ADAMSON UNIVERSITY**

2020-2024  
 Computer Science career, in progress.

## SKILLS SUMMARY

Graphic Design    Programming    MS Proficiency

●●●●●●●●    ●●●●●●●●    ●●●●●●●●

## WORK EXPERIENCE

- 2021-2022
- Work Immersion at Saint John Parochial School Education Department
    - SHS work immersion subject
  - FREELANCE DESIGNER
    - Creating logos in Adobe Photoshop
    - Projects like Social Media Post
- 2024
- Internship

## E. Certificate of Completion

### CERTIFICATE OF COMPLETION

This is to certify that **Mr. Mewhyne Taguibao** has completed his internship at Valmiz, Inc. from February 1, 2024 to April 8, 2024.

This also certifies that he has finished the required 480 hours of practicum in this company.

This certification is issued upon his request for school requirement purposes.

Issued this 5th day of June 2024 in Bauang, La Union.

Truly yours,

**Rommel Martínez**

**CTO**

## F. Narrative Report

As an Intern at ASTN Group in the early week, I am excited to learn and complete a task that will be given to us. We were told to install Linux either on Virtual Machine or Bare Metal.

The first impression of Linux Ubuntu is that there is a lot of difference between Windows and Linux, especially in installing apps and supported apps between the two OS. I tried to make it as close or similar as possible to my Windows settings so even if I boot on Linux, it will not be that different.

After getting a hang of using Linux and installing some apps such as Chrome. We were given the task of installing the emacs this is where we will be coding common-lisp. Then adjust the settings of our emacs to our preferences, after that it a start of learning of common-lisp language.

PCL book was given to us, this is where we will read and learn common-lisp language. Learning this programming language is difficult it is not similar to what I already know but, due to knowing about other programming languages learning this new language is not that hard you just need to give time to read and you will understand it in time.

In around 30th week, the PCL book was hard and needed some other references because from chapter 20 onwards of the book, the basics are done and it is a start of learning some immediate to expert difficulties to understand it.

On the last day of March, I completed the PCL book and I am ready to move on to the next task which is CLOG. CLOG is like HTML, CSS, and JAVASCRIPT but in common-lisp. I was planning on doing a portfolio project on CLOG. It is hard in the first week I am trying to understand how this works. It is lisp but it's like learning another language that is why It took me a week to get a hang of it.

Soon the last day I'm not finished yet with my project but, will continue it even if I am done with an internship

I am glad to be able part of ASTN, now VALMIZ. As an Intern I proudly can say I learned and had fun during my internship at VALMIZ.

Mewhyme Vincent Taguibao  
4A B5 L11 Buenmar Avenue Greenland Subdivision  
Cainta, Rizal

Dear Mr. Taguibao,

We're pleased to inform you that you have been selected as one of the interns for the Engineering department of ASTN Group, Inc.

The internship period will commence on February 1, 2024 and will end after the completion of the required hours that you will have to render.

We hope that this will be the start of a mutually benefitting relationship.

Truly yours,

A handwritten signature in black ink, appearing to read "RM", is positioned above the typed name of the sender.

## E. Certificate of Completion

### CERTIFICATE OF COMPLETION

This is to certify that **Mr. Rhon Licsi** has completed his internship at Valmiz, Inc. from February 1, 2024 to April 8, 2024.

This also certifies that he has finished the required 480 hours of practicum in this company.

This certification is issued upon his request for school requirement purposes.

Issued this 11th day of June 2024 in Bauang, La Union.

Truly yours,

**Rommel Martínez**

**CTO**

**VALMIZ, INC.**

## F. Narrative Report

My On-the-Job Training (OJT) experience was both challenging and rewarding, as I navigated new technologies and methodologies. This was my first time using Linux and adapting to its command line and file system was a significant challenge. Additionally, learning Lisp and Emacs for our development tasks was initially overwhelming due to Lisp's unique syntax and Emacs's complex interface. Our training revolved around the Practical Common Lisp (PCL) book, consisting of 30 chapters, with daily output requirements that demanded a rigorous pace.

Sir Rommel, our mentor, was instrumental in guiding us through this process, emphasizing flexible time management, the importance of small progress, and enjoying the coding journey rather than rushing through it. Despite facing medical issues that caused delays, I was determined to complete the PCL book. In the later stages, Sir Rommel assigned me a special task to further test my skills, which was particularly challenging but ultimately rewarding. This experience taught me invaluable lessons in perseverance, effective time management, and maintaining a positive attitude.

In the end, I completed both the task and the PCL book, grateful for the opportunity and guidance provided by Sir Rommel, and eager to apply these skills in my future endeavors.
